

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1-6. (Canceled)

7. (Currently Amended) An optical disk restoration ~~apparatus, which is characterized in that it comprises:~~apparatus comprising:

a) a rotatable object holder for holding an object to be polished;

b) a turret for holding multiple polishing ~~bodies;~~bodies during polishing operations;

c) a turret driver for rotating the ~~turret;~~turret between polishing operations to interchange between polishing bodies being positioned opposite the object to be polished;

d) a linking mechanism for holding one of the polishing bodies while allowing its ~~rotation;~~the polishing body to rotate;

e) a pressing/separating means for pressing or separating the object to be polished and the polishing body held by the linking mechanism onto or from each other;

f) a driver for rotating ~~at least~~ the linking mechanism;

g) a rotating controller for regulating the rotation of the rotatable object to be polished;

and

h) a linking part connecting the rotation controller and the object holder inserted through a cavity of a shaft of the ~~turret;~~turret, wherein

the driver is a single driver including means for selectively coupling to each of the multiple polishing bodies when the turret positions each of the multiple polishing bodies opposite the object to be polished.

8-10. (Canceled)

11. (Currently Amended) The optical disk restoration apparatus according to claim 7, ~~which is characterized in that~~wherein the shaft of the turret has a cavity whose diameter is

adequately large.

12. (Currently Amended) The optical disk restoration apparatus according to claim 7, ~~which is characterized in that~~wherein the rotating controller is located at the lower end of a shaft of the object holder.

13. (Currently Amended) The optical disk restoration apparatus according to claim 7, ~~which is characterized in that~~wherein the object holder and the turret are arranged so that they are substantially concentric with and parallel to each other.

14. (Currently Amended) The optical disk restoration apparatus according to claim 11, ~~which is characterized in that~~wherein the object holder and the turret are arranged so that they are substantially parallel to each other but are not substantially concentric with each other.

15. (Currently Amended) The optical disk restoration apparatus according to claim 7, ~~which is characterized in that~~wherein the object holder and the turret can be disengaged from each other by a vertical motion or a rotation of the object holder and/or the turret.

16. (Withdrawn-Currently Amended) The optical disk restoration apparatus according to claim 7, ~~which is characterized in that~~wherein the turret holds the linking mechanism by holding claws.

17. (Currently Amended) The optical disk restoration apparatus according to claim 7, ~~which is characterized in that~~wherein the turret holds the linking mechanism by a magnetic force.

18. (Withdrawn-Currently Amended) The optical disk restoration apparatus according to claim 7, ~~which is characterized in that~~wherein the turret holds the linking mechanism by a thread engagement.

19. (Withdrawn-Currently Amended) The optical disk restoration apparatus according to claim 7, ~~which is characterized in that~~wherein the turret holds the linking mechanism by an elastic force of a spring.
